

Chat R.P.G

Speak and build your soul.

Chat R.P.G

WEB3 = A place where people gather to express their pure identity.

In this space,
by quantifying one's activity history, credibility, contributions, cooperativeness, intelligence, compassion, power, and leadership, one's pure identity can be proven.

Those who are active in WEB3 will understand well how much significance these status values hold.

These numbers become a special tool within each WEB3 community,
allowing others to recognize a person's greatness. Until now, this has never been possible to visualize. When new users join a community, it has always taken careful observation to understand their role or significance within that community.

By introducing this application,
the key figures of a community can be instantly recognized.

Chat R.P.G

“Words shape who you are.”

“Thoughts influence others.”

This experience fuses entertainment, learning,
and relationship-building, creating a new kind of

“Human Growth R.P.G.”

Chat R.P.G is not just a bot game.

Chat R.P.G

Back ground

The final boss of modern society is the surveillance state.

Our everyday conversations are collected without consent, sold, and used to train AI models.

Even on platforms that appear “encrypted,” metadata continues to be tracked and harvested.

In today’s world, our thoughts, emotions, and behaviors—in other words, our very humanity—are being monetized.

Chat R.P.G is a tool to reclaim our privacy.

Chat R.P.G — A Next-Gen Chat R.P.G Where Your Words Shape Your Growth

1. Project Overview

Item	Description
 Game Title	Chat R.P.G
 Concept	A real-time R.P.G on Discord where your words become value, and an AI evaluates players for growth
 AI Evaluator	God Bot (GPT-4 Turbo) — An omniscient presence that analyzes meaningful conversations only
 Evaluation Scope	Only users who hold a Passport NFT are eligible for evaluation and participation
 Data Management	Supabase for logs, evaluations, stats, and NFT holder verification; chat logs stored from Discord
 Admin Panel	Web UI (Next.js) – Adjust AI evaluation rules in natural language, visualize user growth

2. Growth System Design 🌱

1. Each player has 9 core stats, ranging from Level 1 to 999
2. Stats can increase or decrease depending on the content of their messages
3. AI focuses on 2–3 relevant stats per message to reduce processing load and maintain precision

Stat	Description / Examples of Behavior
 Leadership	Initiating action, summarizing, setting direction
 Cooperation	Empathy, harmony, supporting others' viewpoints
 Imagination	Creativity, artistic expression, poetic/metaphorical language
 Order/Discipline	Logical thinking, task management, sincerity
 Courage	Bold ideas, expressing unpopular opinions, taking initiative
 Compassion	Kindness, emotional support, offering help
 Spirituality	Philosophical views, higher-level thinking, metaphysical perspective
 Power	Charisma, presence, strength of influence
 Intelligence	Analytical reasoning, structured thought, problem-solving

XP Rules

XP is earned from overall activity and evaluation

Unlimited growth; used as a separate measure of influence and engagement

3. Critical Evaluation

 What is a Critical Hit?

1. Triggered when the AI detects a deeply impactful message
2. Delivers a large bonus score (10+ points) and recognition
3. Example:

 Critical Hit! 

“This statement dramatically shifted the tone of the conversation.”

→ Imagination +5, Leadership +4, XP +50

 Criteria for Critical Hits:

1. Changes the emotional tone or flow of discussion
2. Reframes shared understanding
3. Influences multiple participants at once

4. Example Messages and Evaluations

Player Message	Stat Evaluation	XP	Notes
"Should we try to summarize our points and move forward?"	Leadership +2, Order +1	10	—
"I really relate to that. I've been through something similar."	Cooperation +2, Compassion +1	7	—
"If there were no borders, then maybe our potential is limitless."	Imagination +3, Spirituality +1	12	—
"I feel like that one line changed how we all think."	Leadership +4, Power +3 (Critical)	50	Critical Hit

5. Player Features

Feature	Description
/status Command	Players can DM the bot to view their current stats, XP, and levels
 Growth Alerts	Notifications sent via DM or channel when stats level up
 Weekly MVP Rankings	Weekly top performers showcased via embedded messages
 Profile Generator (Planned)	GPT analyzes message history to generate a unique character bio (RP enhancement)

6. Admin Panel Features

Admin Functions

Feature	Description
Member Overview	View all members' stats, XP, and growth history
Evaluation Log Review	Review AI scores, reasoning, and message logs
Natural Language Rule Editor	Modify GPT evaluation behavior using human language (e.g. "Include humor under Intelligence")
Manual Adjustments	Add/subtract points manually for events or balancing
MVP Aggregation & Posting	Automatically compile and post top performers each week

7. Event Design: Chat Battle 🏰

Chat Battle

Item	Description
Format	/battle @player → 1v1 dialogue-style freestyle “rap battle”
GPT Evaluation	Based on stats like Intelligence, Power, Imagination, Order, Courage
Display Format	Score + Winner + AI Comment
Example	“Metaphorical Sharpness: Imagination +3”, “Structured Insight: Order +2”

8. Implementation Roadmap 🧱

🚧 Phase 1: Initial Launch

1. Discord Bot: Message detection → GPT evaluation
2. Supabase: Store data and evaluations
3. /status Command
4. Critical Hit detection and rewards
5. NFT Passport ownership verification (via simple API)

🚀 Phase 2: Expansion

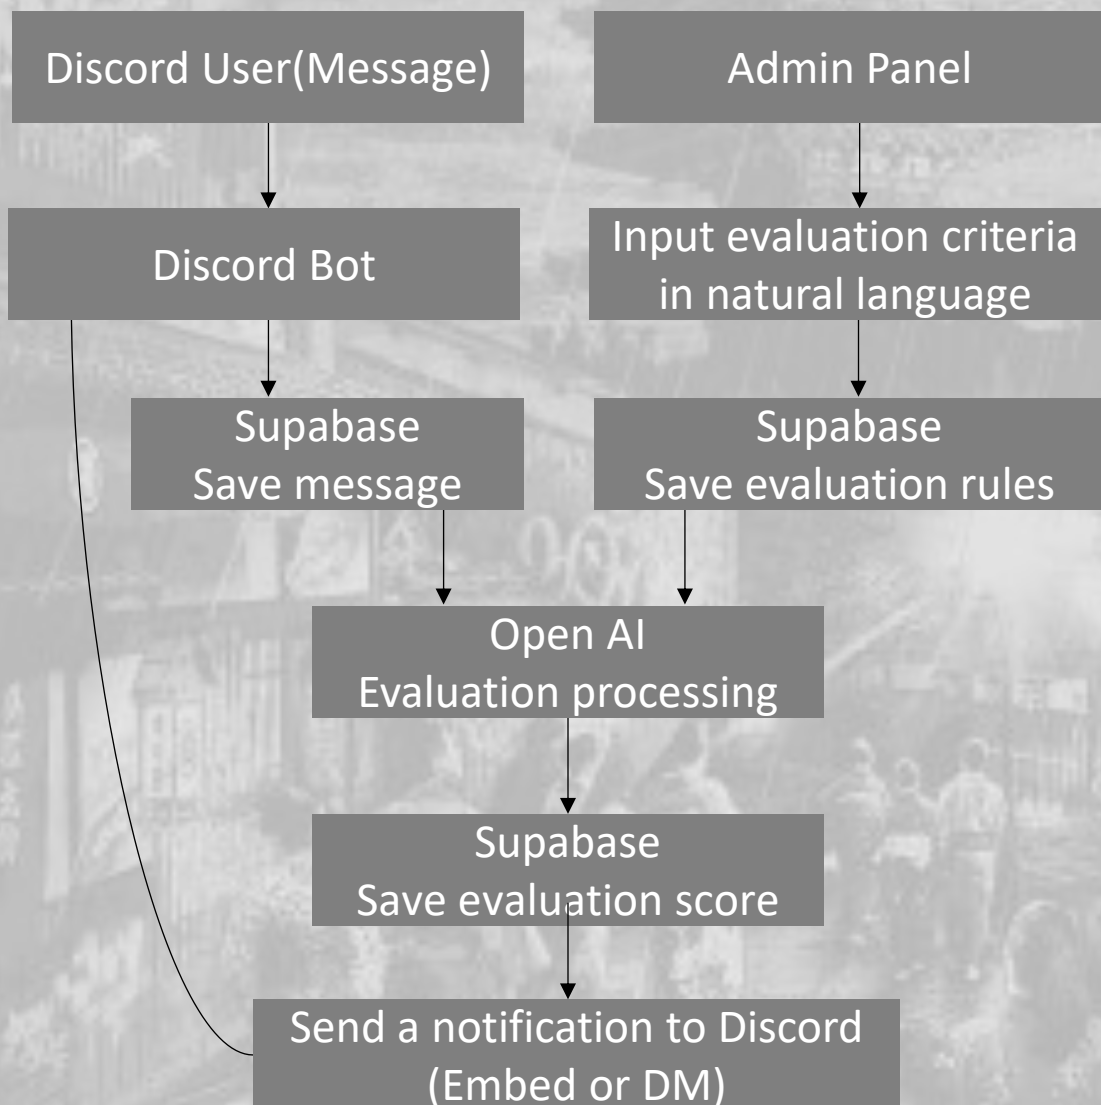

1. Chat Battle Event System
2. Admin Panel with natural language control
3. Weekly MVP and Leaderboard Display
4. Profile Generation via GPT
5. Data visualization: XP & Stat Progress Charts

9. Core Vision and Value

Chat R.P.G is not just a game.
It's a human-growth R.P.G where “words shape character”
and “thoughts influence others.”

A fusion of entertainment, self-development, and social
dynamics powered by AI.
